IT Projects

- Create responsive websites using HTML/CSS/JS/jQuery/Bootstrap and WordPress
  - I have created my portfolio website from scratch using HTML/CSS and JS frameworks. I have also created WordPress websites and hosted content online.
- Create a login system using PHP and MySQL that connects and stores information on a database (phpMyAdmin)
  - I have created a simple login system using HTML/CSS for the design aspects and PHP and SQL for the back-end programming. Users can login and sign-up and view personalized website information.
- Create an interactive game using Java programming
  - I have created a game as part of my Java programming module which includes interactive sprite images that move on keypress and level progression through event listeners.
